E39 Vågsbotn-Hylkje

SHORT DESCRIPTION

Implenia has developed a new four-lane road from the roundabout in Vågsbotn to the junction at Haukås Næringspark. The road passes through Eikåsen as a tunnel. The aim was to improve traffic safety and accessibility in the area for motorists, pedestrians and cyclists. Implenia has developed a new four-lane road from the roundabout in Vågsbotn to the junction at Haukås Næringspark.

THE PROJECT

The project included 1.7 kilometres of road at Vågsbotn, of which 1.2 kilometres was laid in a new terrace including 0.6 kilometres of tunnel. The roundabout at Vågsbotn has been extended and a viaduct constructed above the roundabout to provide a direct connection for traffic from Åsane to Nordhordaland. The project also included a new local road around Vikaleitet which was given a separate exit on the new Vågsbotn roundabout. A new pedestrian and cycle path was constructed and passes through a culvert under the E39 at the junction for Haukås Næringspark.

Project details:

- Contract type: Total contract/Prime contract
- Contract sum: MNOK 319
- Construction time: March 2012 to October 2014
- Developer: Statens vegvesen, Region West
- Client: Statens vegvesen, Region West

FACTS
