New building Surgical University Hospital Heidelberg 1. BA

SHORT DESCRIPTION

The federal state of Baden-Württemberg, represented by the Amt Vermögen und Bau, Heidelberg University Construction Office, is realizing the 1st construction phase of the new building of the Surgical University Hospital Heidelberg - "Im Neuenheimer Feld". The facade was realized by Implenia Fassadentechnik.

THE PROJECT

The building with up to seven levels is divided into several components. On the roof area of component A there is a helipad. The 1st BA directly adjoins the existing Medical Clinic and will create the ring closure between the Gynaecological and Dermatological Clinic, the Surgical University Clinic and the Medical Clinic. The first construction phase is scheduled to be occupied in 2018.
