OMS, Bâtiment B

SHORT DESCRIPTION

Construction of a new administration building on the campus of the World Health Organisation. Demolition and remediation of contaminated sites in advance.

THE PROJECT

Extensive demolition and renovation work in advance. Realisation of the project taking into account the organisational constraints of the site; very safe access to the site, traffic management on Avenida Appia, neighbouring buildings in operation, strict demarcation of the construction site areas, adaptation of certain working hours, constraints of the neighbourhood (US mission), management of the easements for the pedestrian passage, high architectural quality.

SERVICES IN DETAIL

Programme with 8 office floors, 1 auditorium of 800 m^2 with 5 adjoining rooms and 13 translation offices, 1 restaurant, 1 crisis room.

Building volume: 122,000 m^3
