Tennet-Campus Lehrte

SHORT DESCRIPTION

TenneT hat Implenia mit dem Neubau des neuen Campus für rund 650 Mitarbeiter in Lehrte bei Hannover beauftragt.

THE PROJECT

Implenia has been commissioned to build the new campus at the Lehrte site near Hanover for TenneT, a leading European transmission system operator. Implenia's building construction branch in Hamburg will implement the construction project in a consortium with Implenia Fassadentechnik.

SERVICES IN DETAIL

Around 650 modern, light-flooded workplaces will be created in the two new building blocks and the planned conversion of the existing buildings. TenneT wants to increase its attractiveness as an employer in the region and in a competitive market for well-trained engineers and economists at the site with a working environment that promotes creativity.

The independent conference center can also be used for smaller events. A new company restaurant, a cafeteria as a central communication area, as well as attractive outdoor facilities and an inner courtyard with seating are designed to

promote togetherness. A fitness area with appropriate sports facilities completes the offer.
