Zentralstrasse 37– Town Town

SHORT DESCRIPTION

The 1970s office building has undergone total renovation and conversion creating a residential building with 35 flats, 3 studio flats and 4 commercial units on the ground floor.

THE PROJECT

The existing structure comprising columns and concrete floor slabs remains visible and is an integral component of the redesigned glass fibre reinforced concrete facade. Solar shading is provided by external vertical blinds. In addition, roof terraces were formed on floors 3–5.

Despite having a glass fibre reinforced concrete facade, the building received the Swiss Minergie® energy label in line with the specifications.

SERVICES IN DETAIL

- Implementation as total contractor

- Conversion / new construction of a commercial / apartment building

CHALLENGES

- Adaptation of the seismic structural design to the entire building
- The installation of new building services in a former office building required meticulous pre-planning prior to construction
- Complex specifications by architects in relation to the new GRC facade
- Restricted inner-city site demanded considerable organisational skills

SUSTAINABILITY

- Awarded the Minergie® Swiss energy label.

FACTS

Location	Zentralstrasse 37, Zürich , Switzerland
Status	completed
Construction volume (value of our services)	18 M CHF
Start of construction	September 2015
Completion	April 2017
Building owner	Moser Bau AG CH-6300 Zug
Architect	Demuth Hagenmüller & Lamprecht Architekten AG CH-8001 Zürich
Total contractor	Implenia Schweiz AG Modernisation & Development Modernisation CH-8050 Zürich;
Measurement, control and regulation technology (MCR)/Building automation (GA) planner	Getec Zürich AG CH-8052 Zürich
Energy supply planner	R+B Engineering AG CH-6340 Baar
Civil engineer	Dr. J. Grob & Partner CH-8400 Winterthur
